

MONTROYAL

CHOOSING THE RIGHT STRUCTURE

Compare the advantages of engineered wood with solid hardwood flooring

SOLID HARDWOOD FLOORING

Tradition

Red Oak | Maple | Birch | Cherry

- Manufactured in Canada
- Random length
- Tongue and groove construction on sides and ends
- 4 side micro-beveled edges
- Installation on the main floor or upstairs
- Having a 6 mm usable hardwood surface it can be re-sanded 5 times or more

ENGINEERED FLOORING

Stable Plus

Red Oak | Maple

- 4 mm top-layer of solid-sawn noble hardwood
- 15 mm Baltic Birch hardwood plywood base
- Available grades:
Extra | Prestige (Husky)
Adirondack | NorthPlank (Husky)

Stable

Red Oak | White Oak | Maple

- 1 mm top-layer
- 9 plies of perfectly balanced birch hardwood
- Available grades:
Adirondack | NorthPlank (Husky)

- Manufactured in Canada
- Random lengths
- Tongue and groove construction on sides and ends
- 4 side micro-beveled edges

More Installation Options

- Can be installed ANYWHERE!
- On the main floor or upstairs
- In the basement
- Over radiant heated sub-floors
- In condominiums
- Over most existing types of floor-coverings

Better Stability

The risk of gapping or swelling caused by changes in humidity is virtually eliminated with our engineered flooring, making it a great option, especially if you prefer wider planks

More Ecological

Utilizes 4 times less noble wood than solid hardwood floors.
